PRACTICE QUESTIONS

Why this programme

Program Overview

The **PMI-ACP®** is the Project Management Institute's agile credential — and unlike single-framework certificates, it is deliberately **framework-agnostic**, drawing on Scrum, Kanban, Lean, Extreme Programming (XP) and broader agile leadership. It is the certification employers point to when they want proof of real agile competence, not just familiarity with one method.

Hanux Learning's PMI-ACP® training is built against the **updated Exam Content Outline** and its four domains — **Mindset, Leadership, Product and Delivery**. You'll learn to lead agile teams, deliver value iteratively, engage stakeholders and coach for continuous improvement — while preparing to pass the exam with confidence.

Built on the current exam, not the retired one. PMI restructured the PMI-ACP® on 8 November 2024 — from seven domains down to four (Mindset, Leadership, Product, Delivery). Training written to the old seven-domain outline prepares you for an exam that is no longer offered. This curriculum is written to the current version.

Program Features

21 agile contact hours, live & instructor-led

Real-time sessions delivering the training hours PMI requires — not pre-recorded playback.

1,500+ exam-aligned questions & full mocks

Timed simulations across all four domains, with a rationale for every answer.

Multi-framework, hands-on labs

Practise Scrum, Kanban, Lean and XP — not allegiance to a single method.

Comprehensive agile study materials

eBooks, framework cheat-sheets, domain assessments and revision sheets included.

Study plans, mentorship & 24/7 support

A structured path to exam day, with help whenever you need it.

PMI® membership & PDU guidance

Support with PMI resources, the application, and the 30 PDUs needed to renew.

How you'll learn

Delivery Mode

The programme runs on a **blended model**: self-paced content you work through on your own schedule, anchored by live instructor-led sessions where agile is actually practised — facilitation, coaching and real team scenarios you can't learn from a video.

01 Online self-learning

- Structured video modules mapped to the four exam domains
- Practice questions and framework quizzes after every module
- Downloadable agile templates, cheat-sheets and guides
- Progress tracking so you always know what's left

02 Live online instructor-led

- Scheduled sessions delivering the full **21 agile contact hours**
- Sprint simulations, facilitation drills and coaching practice
- Live Q&A, doubt-clearing and peer discussion
- Session recordings available if you miss one

Corporate & team delivery. The same curriculum runs as a private cohort for in-house agile teams — ideal for organisations standardising delivery across squads or an agile transformation. Contact us for group pricing.

Where this programme is different

Hands-On Agile Experience

Agile is a practice, not a theory. The PMI-ACP® exam is a **judgment test** — it checks whether you can think like an agile practitioner in messy, real situations. So this is a **practice-first bootcamp**: every concept is applied in a live team scenario, so you finish **job-ready — not just exam-ready**.

The Hanux principle: learn it, then do it. Roughly half of every session is hands-on — running ceremonies, slicing backlogs, reading flow metrics and facilitating real agile conversations.

What "Hands-On" Means Here

Run real agile ceremonies

Sprint planning, daily stand-ups, reviews and retrospectives — facilitated by you, critiqued live.

Work across frameworks

Choose Scrum, Kanban or a hybrid by fit — the exam rewards judgment, not preference.

Slice backlogs & map value

User-story writing, story mapping, prioritisation and building a release plan that delivers value early.

Read the flow metrics

Velocity, burndown, cycle time and throughput — interpret them and act, not just draw them.

A Typical Live Session

1

Concept

A focused, domain-aligned teaching block — no filler.

2

Demonstration

The instructor facilitates a real agile scenario live.

3

You facilitate

You run the ceremony or artifact yourself on a live team.

4

Review

Work is critiqued and tested with scenario-based questions.

The agile practitioner's toolkit

Agile Tools & Templates You'll Master

Employers hire agile practitioners who are productive from day one. You'll work hands-on with the **tools agile teams actually use** and leave with a **ready-to-use template library** for your next role.

Tool Categories You'll Practise With

Agile boards & backlogs

Sprint boards, Kanban boards and product backlogs on the collaboration tools teams rely on.

Flow & velocity metrics

Burndown, burnup, cumulative flow and cycle-time charts that drive real decisions.

Estimation & planning

Story points, planning poker, affinity estimation and release/roadmap planning.

AI & productivity tools

GenAI assistants applied to backlog refinement, retro analysis and reporting.

Your Take-Away Template Library

Product Backlog

Sprint Board & Plan

User Story & INVEST Guide

Story Map

Definition of Done / Ready

Burndown & Burnup Charts

Kanban Board & WIP Limits

Retrospective Formats

Release & Roadmap Plan

Working Agreement

Stakeholder Map

Impediment Log

Confirm your exact tool names before publishing

The categories above are accurate for a hands-on PMI-ACP® programme. If your labs use specific named software (a particular agile board or metrics tool), name it here — concrete tool names are more persuasive to buyers.

The case for certifying now

Agile Demand Analysis

MARKET TRENDS

Agile is how modern teams work

Around 70% of organisations report using agile in their delivery, and most enterprises now run hybrid — a blend of predictive, agile and DevOps. Agile literacy is now expected, not optional.

TALENT GAP

Proof beats familiarity

Many professionals know agile terms; far fewer can evidence real competence. PMI-ACP® is the credential employers use to tell the difference — and it hires certified people first.

ACROSS INDUSTRIES

Not tied to one method

Because it spans Scrum, Kanban, Lean and XP, PMI-ACP® travels across IT, product, finance, healthcare and the public sector — and across job titles.

Why the timing matters. The exam changed in November 2024. Candidates trained on the retired seven-domain outline are preparing for a version no longer offered — certifying against the current four-domain standard is a genuine differentiator on a CV.

The return on your investment

Job-Ready Career Outcomes

This programme is designed to make you **employable in agile roles** — the certification, the hands-on facilitation experience, and the artifacts to prove it. PMI-ACP® carries one of the strongest wage premiums among agile credentials.

~US\$123K

Average reported salary for PMI-ACP®-certified professionals in the U.S.

~20%

Typical pay premium reported by PMI-ACP® holders over non-certified peers.

~70%

Of organisations report using agile in delivery — demand keeps climbing.

Figures are market indicators drawn from public 2025–2026 salary surveys and PMI research; they are not a guarantee of individual earnings. Senior agile roles — Agile Coach and Agile Delivery Manager — commonly reach US\$130,000–155,000+ in technology and enterprise environments.

Agile Roles You'll Be Ready For

Scrum Master	Agile Coach
Agile Project Manager	Product Owner
Agile Team / Delivery Lead	Iteration Manager
Release Train Engineer (RTE)	Agile Consultant

The Hanux Job-Ready Package

- ✓ A **globally recognised agile credential** — the PMI-ACP® plus your 21 contact hours certificate
- ✓ A **portfolio of agile artifacts** from the hands-on labs and capstone
- ✓ A **market-ready CV and LinkedIn profile** benchmarked against live agile job specs
- ✓ **Interview confidence** from structured mock interviews with feedback

Standards & exam structure

Exam Alignment

This programme is designed in alignment with the current **PMI-ACP® Examination Content Outline** and the **Agile Practice Guide**. The updated exam is organised around **four domains** and tests applied judgment across multiple agile frameworks — Scrum, Kanban, Lean, XP and scaled approaches.

The Four Exam Domains

Mindset

28%

The agile manifesto, values and principles, and the mindset shift for agile and enterprise-agile environments.

Leadership

25%

Servant leadership, coaching, facilitation and leading remote or distributed teams and stakeholders.

Product

19%

Value clarity, outcome thinking, backlog and roadmap — delivering the right thing, not just more output.

Delivery

28%

Flow, iterative delivery, metrics and continuous improvement — getting value out the door reliably.

How We Prepare You for Each Domain

- ✓ **Mindset & Leadership first** — working agreements, facilitation and coaching, because they anchor the other domains
- ✓ **Product & Delivery next** — value clarity and flow, where project-background candidates most often lose marks
- ✓ **Scenario drills throughout** — every domain is rehearsed as "when to use what", not memorised definitions

Exam format: 120 questions in 180 minutes — a mix of multiple-choice, multiple-response and drag-and-drop items, with a short break after the first half. We prepare you for every item type under timed conditions.

An Independent & Authorized Training Company. Hanux Learning delivers this programme as an independent, authorized training provider, with a curriculum built to the current PMI-ACP® standard. On completion you receive a **21 agile contact hours certificate** — the training requirement for your PMI-ACP® application.

Before you apply

Eligibility & Pre-requisites

The PMI-ACP® has clear eligibility rules set by PMI®, covering education, agile training hours and hands-on experience. You must meet **all** of the following to apply.

01 Education

- A **secondary degree** — high-school diploma, associate degree or global equivalent

02 Training

- **21 contact hours** of agile-practices training (the current requirement from March 2026)

03 Experience

- **Agile project experience** earned within the last few years, per PMI's current criteria

The 21-hour training requirement is covered by this programme. On completion you receive your contact-hours certificate, which satisfies that element of the PMI-ACP® application. Your training hours do not expire. If you already hold an active PMP® or PgMP®, part of the general-experience requirement is recognised by PMI.

PMI has adjusted the exact hours and experience figures over recent cycles. We confirm the current numbers against your profile during the free eligibility check, and PMI's official handbook is always the final authority.

Who Should Take This Course

Scrum Masters & agile leads

Project & delivery managers

Product owners & analysts

Developers moving to agile roles

Team leads & coordinators

Agile coaches & consultants

PMPs adding agile depth

Anyone in a hybrid delivery team

What you'll walk away with

Key Learning Outcomes

- ✓ Apply structured strategies to **pass the PMI-ACP® exam on your first attempt**
- ✓ **Choose the right framework by fit** — Scrum, Kanban, Lean or hybrid — not by preference
- ✓ Facilitate agile ceremonies and **coach teams** toward self-organisation and flow
- ✓ **Deliver value iteratively** — slice backlogs, plan releases and manage scope adaptively
- ✓ Engage stakeholders and **lead distributed teams** with a servant-leadership approach
- ✓ Use **agile metrics** to detect problems early and drive continuous improvement
- ✓ Answer **scenario-based questions** the way an experienced agile practitioner would

Agile Skills You'll Acquire

◆ Scrum framework mastery	◆ Kanban & flow management
◆ Lean & XP practices	◆ Servant leadership & coaching
◆ Backlog & story management	◆ Agile estimation & planning
◆ Value-driven delivery	◆ Stakeholder engagement
◆ Facilitation & retrospectives	◆ Agile metrics & reporting
◆ Adaptive & release planning	◆ Continuous improvement
◆ Distributed team leadership	◆ Scaling agile fundamentals

The detailed lesson-by-lesson syllabus is provided as a separate document. Ask our team for the full PMI-ACP® Course Syllabus, which maps every topic to the four exam domains — Mindset, Leadership, Product and Delivery.

What separates this programme

Why Choose Hanux Learning

Most agile training walks you through the syllabus. This programme is built around what decides whether you pass and whether you can actually lead a team: **current content, live facilitation practice, and support that continues after the exam.**

Included as standard

- ✓ Curriculum written to the current four-domain PMI-ACP® exam
- ✓ 21 agile contact hours delivered live, by PMI-ACP® - certified practitioners
- ✓ Multi-framework labs — Scrum, Kanban, Lean and XP
- ✓ 1,500+ questions and full timed mocks with rationale
- ✓ Agile capstone you can show an interviewer
- ✓ CV, LinkedIn and interview preparation, and PMI® application support

Common gaps elsewhere

- Material still written to the retired seven-domain outline
- Single-framework (Scrum-only) teaching sold as full PMI-ACP® prep
- Pre-recorded video with no live facilitation practice
- Question banks without explanations
- No practical artifacts at the end of the course
- Applicant left to navigate PMI® paperwork alone

98%

First-attempt pass rate

The overwhelming majority of Hanux learners pass the PMI-ACP® exam on their first attempt — the result of current content, live practice and readiness measured before you ever book the exam.

Current by design

Content is maintained to the live four-domain exam, so you never revise a version PMI has retired.

Practised, not streamed

Live sessions where you facilitate real ceremonies and get coached — not passive video.

Readiness, not attendance

Progress is measured on domain-by-domain simulation performance, not hours logged.

Who you'll learn from

Learn From PMI-ACP®–Certified Practitioners

Your training is delivered by our **in-house team of certified agile practitioners** — experienced instructors who teach this material full-time, every cohort. Every session is led by someone with a track record of taking candidates through to a first-attempt pass.

15+

Years of teaching experience behind every instructor on the programme.

Multiple

Certifications held across agile and project-management domains.

98%

First-attempt pass rate achieved by learners they've trained.

Certified & multi-framework

Instructors hold agile credentials and coach across Scrum, Kanban and Lean — they teach only what they practise.

15+ years in the classroom

Seasoned educators who have refined how agile is taught across many cohorts.

Exam-focused teaching

Sessions target how the exam frames scenario questions — applied judgment, not memorisation.

Support beyond class

Mentorship, study plans and doubt-clearing continue right up to exam day.

How Sessions Run

- ☒ **Concept, then facilitation.** Each domain is taught, then practised in a live agile scenario
- ☒ **Live doubt-clearing.** Questions are answered in session, not deferred to a forum
- ☒ **Scenario mock reviews.** Instructors explain why the agile-judgment answer is right, not just which one
- ☒ **Recordings available.** Every session is recorded so a missed class never breaks your progress

Support that continues past the exam

Career Acceleration Services

Getting certified is the milestone. Getting hired into an agile role is the goal. This programme includes a **complete career-launch service** so your new credential turns into interviews and offers.

CV & résumé rebuild

Rewritten around agile outcomes and PMI-ACP® keywords, benchmarked against live job specs to clear recruiters and ATS.

LinkedIn optimisation

A profile rebuilt to surface in recruiter searches for Scrum Master, Agile Coach and delivery roles.

Portfolio you can show

Your capstone backlog, board, metrics and release plan, packaged as evidence you can walk through.

Interview preparation

Structured mock interviews on real agile scenarios and behavioural questions, with actionable feedback.

From Certified to Hired

1

Package

Turn your capstone into a portfolio and a targeted CV.

2

Position

Optimise LinkedIn and define the agile roles to pursue.

3

Prepare

Rehearse interviews until your facilitation stories land.

4

Apply

Go to market with evidence, not just a certificate.

Built for career changers too. Moving into agile from development, testing, PM or operations? This is where your existing experience gets reframed in agile language — so a hiring manager sees a Scrum Master or agile lead, not someone starting over.

In our learners' words

What Our Learners Say

Our learners come to us to pass the PMI-ACP® exam and leave ready to lead agile teams. Here is what that experience looks like from their side.

★★★★★

"The framework-by-fit approach clicked for me. I stopped defaulting to Scrum and started reading the situation — which is exactly how the scenario questions are written. Passed first time."

A. R.

Scrum Master · IT Sector

★★★★★

"I moved from a delivery PM role into agile coaching. The facilitation practice and the capstone gave me real stories to tell in interviews. Two offers within weeks."

M. C.

Agile Coach · Financial Services

★★★★★

"Live sessions where you actually facilitate a retro and get feedback — completely different from the recorded Scrum course I'd tried. Worth every hour."

S. P.

Product Owner · Healthcare

★★★★★

"The mocks were harder than the real exam and the metrics labs finally made cycle time and flow make sense. The readiness report told me I was ready before I booked."

R. K.

Agile Delivery Lead · Manufacturing

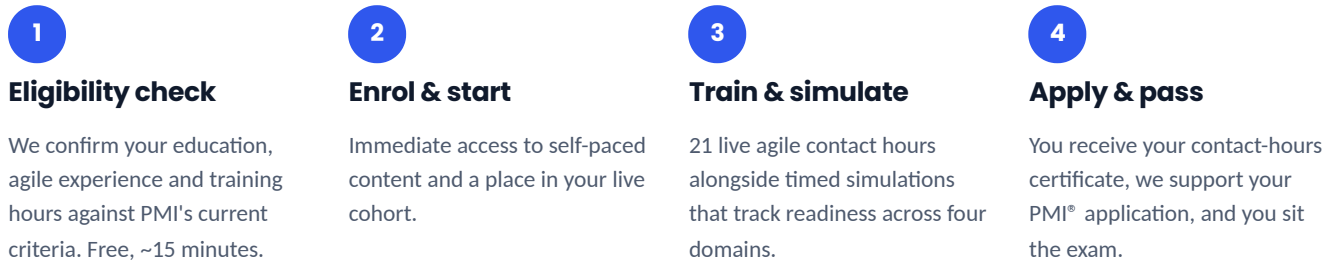

Sample layout — replace with your own verified learner testimonials before publishing.

The quotes above show how this section will look. Swap them for real testimonials from past learners (with their permission). Published testimonials should be genuine and substantiated.

From enquiry to certified

How It Works

Earning the PMI-ACP® is a sequence, not a single exam. Here is the full path, and where this programme supports you at each stage.

What We Handle vs What You Handle

Hanux Learning provides	Paid directly to PMI®
✓ All training, materials and simulations ✓ The 21 agile contact hours certificate ✓ Guidance completing the PMI-ACP® application ✓ Readiness assessment before you book	— PMI® membership, if you choose to join — The PMI-ACP® examination fee — Any re-examination fees — Renewal — 30 PDUs every 3 years

How Long Does It Take?

Most working professionals move from enrolment to certified within a few months. The training itself is fixed at 21 agile contact hours; what varies is your study pace and how quickly PMI® processes your application. We set a target exam date with you at the start and build the study plan backwards from it.

Batch dates, fees and enrolment are all on our website. Cohorts run regularly across time zones convenient for US, Canada and international learners — visit www.hanux.org for the current schedule and to secure your place. Examination and membership fees are set by PMI® and paid directly to PMI®.

Before you commit

Frequently Asked Questions

Is this training aligned to the current PMI-ACP® exam?

Yes. PMI restructured the exam on 8 November 2024 into four domains — Mindset, Leadership, Product and Delivery. This curriculum is written to that outline. Training built on the old seven-domain version prepares you for an exam that is no longer offered.

How many training hours do I need, and does this cover them?

PMI currently requires 21 contact hours of agile-practices training (reverted to 21 from March 2026). This programme delivers them, and your certificate does not expire.

Is PMI-ACP® only about Scrum?

No — that's its key strength. It is framework-agnostic, drawing on Scrum, Kanban, Lean and XP. The exam rewards choosing the right approach by fit, which is why we teach across frameworks rather than one.

Do I need to be a PMI® member to sit the exam?

No, membership is optional. It reduces the exam fee and includes agile resources, so many candidates find it worthwhile. We'll help you compare.

Does the course fee include the PMI-ACP® exam fee?

No. The examination fee is paid directly to PMI® and is separate from course fees. This is standard across all training providers.

What if I miss a live session?

Every session is recorded and made available to you. You can also join the same session in a later cohort at no additional cost.

What if I don't pass on the first attempt?

PMI® permits multiple attempts within your eligibility period. We review your simulation data by domain, target the weak areas, and support you through the retake.

Do you train corporate agile teams?

Yes. The same programme runs as a private cohort with case studies matched to your delivery context, plus consolidated progress reporting for the sponsoring manager.

The organisation behind the programme

About Hanux Learning

Hanux Learning is a provider of professional certification and skill development training. We deliver agile and project management education aligned to current industry standards and practice, with the aim of equipping professionals with the **knowledge, skills and confidence** to lead successful teams and advance their careers.

We believe high-quality training should be practical and accessible — training that changes how people work, not just what they can recite.

Our agile training programmes are

- ☒ Delivered by **certified agile practitioners** with real coaching experience
- ☒ Aligned with the latest **PMI® standards and exam content outlines**
- ☒ Designed for both **individual professionals and corporate teams**
- ☒ Supported by **comprehensive study materials** and ongoing assistance
- ☒ Available in **flexible blended formats** to fit working schedules

Training Teams Rather Than Individuals?

We run the same programme as a closed cohort for organisations standardising agile practice across squads or an agile transformation. Private cohorts include:

- ☒ **A schedule built around your delivery calendar**, including split or evening delivery
- ☒ **Case studies drawn from your own context** so scenarios are recognisable to the team
- ☒ **Consolidated progress reporting** to the sponsoring manager or L&D lead
- ☒ **Group pricing** that scales with cohort size

NEXT STEP

Ready to become PMI-ACP® certified?

Speak to our team about upcoming cohorts, corporate agile training, or whether your experience meets the PMI-ACP® eligibility criteria. Course fees, batch dates and enrolment are all on our website — the eligibility check is free and takes about fifteen minutes.
